

Revolutionary Science, Inc., achieves Quality Management System ISO 9001:2000 Certification

For Immediate Release

Lindstrom, Minnesota, September 25th 2008 – Revolutionary Science, manufacturer of life science laboratory and medical equipment, announced having received ISO 9001:2000 certification. “This is a significant business achievement that required all departments working together toward the common goal of ISO 9001 registration. The decision to pursue certification has strengthened our Marketing, Processes, Quality, and overall commitment to establishing Revolutionary Science as a World Class Manufacturer,” said CEO Chad Erickson.

In 1999, Revolutionary Science was founded after the birth of the company's first micro centrifuge. Years later, Revolutionary Science offers a variety of products for your life science laboratory needs.

Revolutionary Science is a Minnesota company dedicated to the manufacturing of precision life science equipment. Our products vary from centrifuges to steam autoclaves and are available for purchase through our website or a variety of laboratory equipment distributors.

Revolutionary Science acquired its ISO 9001:2000 registration from QAS International Ltd. QAS International Ltd is an established certification company that has been operating within the UK and selected international markets for some ten years. The company provides Certification for companies which have demonstrated through documented procedures and manuals, that their operating practices have achieved the International Standards ISO9000, ISO9000:2008, and ISO14000.
